INFLUENZA COORDINATORS WORKSHOP

B111 / B112

CSTE, in collaboration with the Centers for Disease Control, will be hosting a full day Influenza Coordinators Workshop June 6, 2010 in conjunction with the CSTE Annual Conference. The purpose of the meeting is provide a forum for states and CDC to discuss changes in influenza surveillance, new activities, and increasing demands on states to effectively perform surveillance functions

Invited participants include Influenza Coordinators from states and large cities. Participants will also include representatives from the Centers for Disease Control and Prevention.

Learning Objectives:

- Awareness of pandemic planning guidelines for surveillance
- Awareness of ongoing influenza surveillance-related research
- Understanding of H1N1 pandemic planning for the future

INJURY WORKSHOP

B110

Administrative datasets contain identifying information used for surveillance and monitoring activities. However, obtaining specific measures and outcomes often requires the linkage of independently maintained client information. Linking unique clients, individuals or events within and across administrative datasets is a challenging endeavor due to: use of nicknames, hyphenations, misspellings, and transposed SSN digits. Failure to appropriately deal with this problem may lead to incomplete linking of client records and, ultimately, introduce unnecessary error into estimates. In this workshop, three non-commercial readily available record linkage solutions (Link Plus, The Link King, and a generic deterministic algorithm) will be presented along with evidence illustrating the important role linkage algorithms play in generating accurate estimates. The impact of record linkage methodology on surveillance, performance measures and outcome indicators will also be discussed. Finally, a demonstration of a free SAS based record linkage application (The Link King, www.the-link-king.com) will be presented.

Agenda

- Introductions
- Overview of record linkage issues
- Relative accuracy of record linkage algorithms
- Implication of linkage algorithm choice on data analysis
- Record linkage step-by-step
- Q&A
