

STATE OF NEW HAMPSHIRE

Honorarium or Expense Reimbursement Report (RSA 15-B)

Type or Print all Information Clearly:

Name: Cindy Rosenwald Work Phone No. 271-0616

Work Address: Legislative office Building

Office/Appointment/Employment held: state rep

List the full name, post office address, occupation, and principal place of business, if any, of the source of any reportable honorarium or expense reimbursement.

Source of Honorarium or Expense Reimbursement:

Name of source:

Post Office Address:

Occupation:

Principal Place of Business:

RECEIVED

MAY 05 2010

NEW HAMPSHIRE DEPARTMENT OF STATE

If source is a Corporation or other Entity:

Name of Corporation or Entity: Massachusetts Technology Collaborative

Name of Corporate/Entity Representative: Craig Schneider

Work Address of Representative: 2 Center Plaza Suite 440, Boston MA 02108

Food and/or beverages consumed pursuant to RSA 15-B:6, II with value over \$25.00

Value of Honorarium: Date Received: If exact value is unknown, provide an estimate of the value of the gift or honorarium and identify the value as an estimate.

Value of Expense Reimbursement: \$481 Date Received: 4/30 A copy of the agenda or an equivalent document must be attached to this filing.

Briefly describe the service or event this Honorarium or Expense Reimbursement relates to:

attended HIT Conference + spoke on panel

"I have read RSA 15-B and hereby swear or affirm that the foregoing information is true and complete to the best of my knowledge and belief."

Signature of Filer: Cindy Rosenwald

Date Filed: 5/3/10

9/07 RSA 15-B:9 Penalty. Any person who knowingly fails to comply with the provisions of this chapter or knowingly files a false report shall be guilty of a misdemeanor.

Return to: Secretary of State's Office, State House Room 204, Concord, NH 03301

3:45	Break	Exhibit Hall/Galleria
4:15	<b>Option 1: Regional Collaboration Meetings</b> State officials in attendance, and others who wish to observe the discussions, will meet in breakout rooms, with the states being grouped together by CMS regions. The goal of these sessions is to allow public officials to meet with neighboring states to discuss current plans, areas of concern, regional interoperability, and opportunities for collaboration. I (CT, ME, MA, NH, RI, VT): <ul style="list-style-type: none"> <li>• Facilitator: <b>Nancy Peterson</b>, Deputy Director, UMass Medical School/NESCSO</li> </ul> II (NJ, NY, PR, VI) and III (DE, DC, MD, PA, VA, WV): <ul style="list-style-type: none"> <li>• Facilitators: <b>Deborah Adair, MPH, MS, RHIA</b> and <b>Lisa Fenichel</b>, Member, HIT Council</li> </ul> IV: (AL, FL, GA, KY, MS, NC, SC, TN) and V: (IL, IN, MI, MN, OH, WI): <ul style="list-style-type: none"> <li>• Facilitators: <b>Meg Aranow</b>, Vice President and CIO, Boston Medical Center and <b>Marcie Desmond</b>, Secretariat CIO, Commonwealth of Massachusetts</li> </ul> VI: (AR, LA, NM, OK, TX) and VII: (KS, MO, IA, NE): <ul style="list-style-type: none"> <li>• Facilitator: <b>Joel Weissman, Ph.D</b>, Associate Professor (Health Policy), MGH/Harvard Medical School</li> </ul> VIII: (CO, MT, ND, SD, UT, WY), IX: (AZ, CA, GU, HI, NV) and X: (AK, ID, OR, WA): <ul style="list-style-type: none"> <li>• Facilitator: <b>Philip Poley</b>, Chief Operating Officer, Office of Medicaid, Commonwealth of Massachusetts</li> </ul> <b>Option 2: Consumer-Centric: The Role of the Patient in Health IT and HIE</b> <ul style="list-style-type: none"> <li>• <b>John Moore</b>, Managing Partner, Chilmark Research</li> <li>• <b>Daniel Nigrin, MD</b>, Chief Information Officer, Children's Hospital of Boston</li> <li>• <b>Barbra Rabson</b>, Executive Director, Massachusetts Health Quality Partners</li> <li>• <b>David Szabo</b>, Partner, Edwards Angell Palmer &amp; Dodge LLP</li> <li>• Moderator: <b>Paula Griswold</b>, Executive Director, Massachusetts Coalition for the Prevention of Medical Errors</li> </ul> Every future-state vision of an health IT-enabled healthcare system is described as "consumer-centric" or "patient-centric." What are the challenges and opportunities implied by a consumer-centric healthcare system? What role will personal health records play in the future of healthcare? What are the privacy and security challenges that still need to be addressed? How can we implement systems that honor a patient's wishes regarding access to their personal health information?	Harbor Ballroom III  Burroughs Room  Lewis Room  Stone Room  Otis Room  Harbor Ballroom II
5:30	<b>Networking Reception</b> Remarks: <b>Therese Murray</b> , President, Massachusetts Senate	Exhibit Hall/Galleria
7:00	Adjourn	

While the need for federal healthcare reform had been a long standing issue implementing federal reform comes at a time when unemployment is an acute and pressing problem. Every state needs to ensure not only that Health IT investments are used to improve the healthcare delivery system, but also that these investments create the jobs that are needed now and in the future as the IT adoption wave rolls across the healthcare system. The Health IT revolution will create demands for new training, skills and jobs. States can take this opportunity to help dislocated workers meet the anticipated demand thus improving their healthcare systems and putting people back to work at the same time.

Over the next two days, you will have the chance to hear about these critical topics from federal and state officials, as well as prominent healthcare leaders, including Secretary of Health and Human Services Kathleen Sebelius, National Coordinator for Health IT Dr. David Blumenthal, Massachusetts Secretary of Health and Human Services Dr. JudyAnn Bigby, Dr. John Halamka, Dr. Paul Tang, Dr. Marc Overhage, Dr. Karen Bell, Micky Tripathi, Janet Marchibroda, and many more.

In addition to the excellent speakers and moderators, your participation is critical to the success of this conference, which brings together health and human service leaders, public health commissioners, Medicaid directors, HIT coordinators, and economic development officials from 30 states. In addition to these public officials there are also many business executives from the Health IT arena and senior healthcare leaders in attendance. The conference program has been designed to allow many opportunities for discussion and interaction.

I hope you enjoy the **Health Information Technology** conference and that you will both learn and share what you know while you are here in Massachusetts. Thank you for coming.

A handwritten signature in black ink, appearing to read "David Blumenthal". The signature is fluid and cursive, with a large loop at the beginning and a long, sweeping tail.

12:30	Networking Luncheon	Exhibit Hall/Galleria
1:30	<p><b>Breakout Sessions Round 1</b></p> <p>There are two types of breakouts: “discussions” and “panels.” “Discussions” are sessions with a brief introduction by the moderator, followed by a series of five-minute talks by representatives of various states that will discuss the issues in their states and share lessons learned and best practices, and invite open discussion with other attendees. “Panels” are sessions that will have 10-15 minute presentations by the panelists, followed by Q&amp;A with the audience.</p> <ul style="list-style-type: none"> <li>• <b>Discussion: Achieving Sustainable Success</b>            Arguably the greatest challenge facing policymakers and healthcare providers is finding ways to sustain ongoing health IT and HIE activities once federal HITECH funding is over. This breakout discussion will focus on the most promising options for bringing public and private stakeholders together to achieve sustainable success.             Facilitator: <b>Janet Marchibroda</b>, Under contract with the Office of the National Coordinator for Health IT</li> <li>• <b>Discussion: Making a Difference - Health IT and Clinical Quality Improvement</b>            The great promise of health IT is that it can both lower costs as well as improve the quality of healthcare. This breakout discussion will feature leading clinicians from Massachusetts and other states and will focus on how the encounter between a clinician and a patient can be improved by health IT.             Facilitator: <b>JudyAnn Bigby, MD</b>, Secretary, Massachusetts Executive Office of Health and Human Services</li> </ul>	<p>Lewis Room</p> <p>Burroughs Room</p>

	<ul style="list-style-type: none"> <li> <b>Panel: State Initiatives in Healthcare Reform</b>            Whether at the national level or at the state level, the triple challenge of controlling costs, improving quality, and increasing access to healthcare means that healthcare reform will continue to be the great public policy challenge of our time. States did not wait for the federal government to act before trying to improve access to care and quality of care for their citizens. This panel features three of the leaders of the Massachusetts healthcare reform experiment, and two legislators from New England states that have developed innovative expansions of coverage for their residents.  <b>Jon Kingsdale</b>, Executive Director, Commonwealth Health Insurance Connector Authority  <b>Lisa Marrache, MD</b>, Senator, Maine Senate  <b>Richard T. Moore</b>, Senator, Massachusetts Senate  <b>Cindy Rosenwald</b>, Representative, New Hampshire Legislature  <b>Harriett Stanley</b>, Representative, Massachusetts Legislature            Moderator: <b>Michael Doonan, Ph.D</b>, Executive Director, Massachusetts Health Policy Forum         </li> <li> <b>Panel: Successful HIEs – How They Did It and How It Helps</b>            While health IT has benefits of its own, one of the main advantages of having providers use electronic health records is that it allows for electronic health information exchange to support care coordination, emergency care, population health, and to avoid redundant tests. This panel will feature leaders from established, sustainable HIEs talking about how they were able to achieve success and how it has improved healthcare.  <b>David Delano</b>, Director of Information Technology, Northern Berkshire Healthcare  <b>Lawrence Garber, MD</b>, Medical Director for Informatics, Fallon Clinic  <b>John Kelly</b>, Director of eBusiness Architecture, Harvard Pilgrim Health Care  <b>J. Marc Overhage, MD, Ph.D</b>, CEO, Indiana Health Information Exchange            Moderator: <b>Karen Bell, MD</b>, HIT Council Member         </li> <li> <b>Discussion: Health IT, HIE, and State Medicaid Programs</b>            In virtually every state, the Medicaid program is the health plan covering the largest number of people. Medicaid will also be the source of roughly half of the incentive payments authorized by the HITECH Act. This panel discussion will focus on the challenges and opportunities for state Medicaid programs.            Facilitator: <b>Terry Dougherty</b>, Medicaid Director, Massachusetts Executive Office of Health and Human Services         </li> </ul>	<p>Harbor Ballroom II</p> <p>Harbor Ballroom I</p> <p>Harbor Ballroom III</p>
2:40	Break	Exhibit Hall/Galleria
3:05	<b>Breakout Sessions Round 2</b> <ul style="list-style-type: none"> <li> <b>Discussion: Jobs, Jobs, Jobs—Health IT and State Economic Development Policy</b>            The health IT and HIE adoption waves will have major implications for state economic development policy, particularly in the areas of job creation and workforce development. This will not only create new jobs for those who create, install, and support these new tools, but it will also have a significant impact on the skills required inside healthcare organizations. This breakout discussion will focus on the challenges and opportunities the coming wave presents for state economic policy.            Facilitator: <b>Gregory Bialecki</b>, Secretary, Massachusetts Executive Office of Housing and Economic Development         </li> <li> <b>Discussion: Creating Effective Public/Private Partnerships</b>            Successful health IT implementation will require extensive collaboration between government and the private sector. State agencies will need to work with private provider and payer organizations to ensure interoperability and the availability of adequate funding. This breakout discussion will focus on how to achieve this collaboration to give voice to the many stakeholders needed for health IT and HIE success.            Facilitator: <b>Richard Shoup, Ph.D</b>, HIT Coordinator for Massachusetts, Massachusetts eHealth Institute         </li> </ul>	<p>Harbor Ballroom I</p> <p>Lewis Room</p>
